

Prior Authorization

Your step-by-step guide

What is a Prior Authorization?

Prior Authorization encourages safe, cost-effective medication use by allowing coverage when certain conditions are met. Some medications your physician prescribes will require special approval or authorization before being filled. This review is conducted by a clinical team who closely follow clinical programs and criteria for medications that are appropriate for Prior Authorization and guidelines by U.S Food and Drug Administration (FDA).

Prior Authorizations in most cases are approved for a specific time period and may be subject to continuous evaluation. Should you decide to obtain the medication without a prior authorization, you will be required to pay the full cost of the medication.
